NinjaTrader® 6 Released with High-Performance System Development Capabilities

NinjaTrader 6 sets the benchmark for trading platforms by providing an end-toend solution available through hundreds of brokerages worldwide for any style of futures, forex or equities trader.

DENVER, April 24, 2007 – NinjaTrader, LLC a leading provider of trading software for the active trader, released the 6th major version of their NinjaTrader trading platform earlier today.

This highly anticipated release extends NinjaTrader's leadership position in advanced trade management for the discretionary trader while introducing many new innovative features including a complete solution for automated trading system developers. NinjaTrader 6 is free to use for advanced charting, market analytics, system development and trade simulation providing a comprehensive end-to-end trading solution for futures, forex, and equities traders.

Traders will find the following new features and enhancements in NinjaTrader 6:

- **Trading System Development & Backtesting**: A complete solution for the development, backtesting, real-time simulation testing and live deployment of automated trading strategies through any one of over 100 supported brokers worldwide.
- Chart-Based Order Entry: Traders can now place, modify, cancel orders and visualize positions directly within a chart.
- Advanced Charting: Significant charting improvements including 100+ indicators, powerful volume analysis indicators, new visualization options and bar interval types of any compression.
- Market Analyzer[™]: a turbo-charged quote sheet with multi-instrument real-time scanning and analysis with access to over 100 pre-built indicators and data columns.

- ◆ 3rd Party Support: Increasing 3rd party vendor support including KwikPop, MTPredictor, Jurik Research, ShadowTraders, Advanced Trading Workshop, Final, eMiniMaster and more.
- **Improved Performance**: More efficient in handling high throughput market data vendors and ultra-high performance trading systems.

"NinjaTrader 6 is a major milestone in providing a high-performance end-to-end trading platform for the active trader that enables both discretionary and automated trading of any asset class through a global network of supported brokers", stated NinjaTrader, LLC President and CEO Raymond Deux, "We are also extremely excited to introduce our new system development capabilities that empowers traders to construct and deploy automated trading strategies using C#, an industry standard programming language."

NinjaTrader 6 is immediately available for download from <u>www.ninjatrader.com</u>.
