## **NinjaTrader® 7.0 Released with Innovative New Charting Features and Major Performance Enhancements!**

*NinjaTrader continues to innovate in the field of charting with significant new features and a focus on end-to-end performance enhancements to extend its award winning platform.*

**DENVER, December 2, 2010** – NinjaTrader, LLC a leading provider of trading software for the active trader, just released the 7<sup>th</sup> major version of their NinjaTrader trading platform.

The highly anticipated release strengthens NinjaTrader's industry leading position by enhancing virtually every aspect of the trading platform while simultaneously increasing system performance. NinjaTrader 7 is free to use for advanced charting, market analytics, system development and trade simulation providing a comprehensive end-to-end trading solution for Stock, Futures, and Forex traders. Download NinjaTrader today and trade what you want, how you want, and where you want!

### **There are over 300 NinjaTrader 7 enhancements including...**

- ◆ **Improved System Performance** – the requirement to handle more market data and react quickly to changing market conditions requires an efficient trading platform. NinjaTrader 7 has responded by reducing its memory footprint, adding multi-core support, improving CPU utilization and introducing a 64-bit version.
- ◆ **Expanded Charting Features**—multi-series charting, indicator-on-indicator capabilities, fixed or automatic scaling, object paint ordering and new chart styles including Renko, Point/Figure, and Kagi are just a few of the over 100 refinements made to NinjaTrader 7 charting.
- ◆ **New Kinetick Market Data Service** – committed to being a universally supported platform, NinjaTrader 7 adds the low cost yet high performance market data services of Kinetick including free end-of-data.
- ◆ **Enhanced NinjaScript Development Environment** – expanding on the success of NinjaScript, new capabilities include an improved strategy

development/backtesting workflow, limitless strategy order submission flexibility, draw object enhancements and improved multi-color plot handling.

- ◆ **Powerful Strategy Backtesting Functionality** – introducing more ways to verify your trading system before deployment including genetic optimization, data series optimization and Monte Carlo analysis.
- ◆ **New Hot Key Manager** – the ability for users to define and assign hot keys for global and local window functions

Please visit the NinjaTrader website for a complete listing of enhancements and upgrades.
