Report of Independent Registered Public Accounting Firm

To the Board of Directors and Member of NinjaTrader Clearing, LLC

Opinion on the Financial Statement – Statement of Financial Condition

We have audited the accompanying statement of financial condition of NinjaTrader Clearing, LLC (the “Company”) as of December 31, 2025, including the related notes (collectively referred to as the “financial statement”). In our opinion, the financial statement presents fairly, in all material respects, the financial position of the Company as of December 31, 2025 in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

The financial statement is the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s financial statement based on our audit. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit of this financial statement in accordance with the standards of the PCAOB and in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statement is free of material misstatement, whether due to error or fraud.

Our audit included performing procedures to assess the risks of material misstatement of the financial statement, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statement. Our audit also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statement. We believe that our audit provides a reasonable basis for our opinion.

Supplemental Information

The accompanying Schedule I - Computation of Net Capital and Minimum Capital Requirements, Schedule II - Statement of Segregation Requirements and Funds in Segregation for Customers Trading on U.S. Commodity Exchanges, Schedule III - Statement of Segregation Requirements and Funds in Segregation for Customers' Dealer Options Accounts, Schedule IV - Statement of Secured Amounts and Funds Held in Separate Accounts for Foreign Futures and Foreign Options Customers Pursuant to Commission Regulation 30.7, and Schedule V - Statement of Cleared SWAPS Segregation Requirements and Funds in Cleared SWAPS Customer Accounts Under 4D(F) of the CEA as of December 31, 2025 (collectively, the "supplemental information") has been subjected to audit procedures performed in conjunction with the audit of the Company's financial statement. The supplemental information is the responsibility of the Company's management. Our audit procedures included determining whether the supplemental information reconciles to the financial statement or the underlying accounting and other records, as applicable, and performing procedures to test the completeness and accuracy of the information presented in the supplemental information. In forming our opinion on the supplemental information, we evaluated whether the supplemental information, including its form and content, is presented in conformity with Regulation 1.10 under the Commodity Exchange Act. In our opinion, the supplemental information is fairly stated, in all material respects, in relation to the financial statement as a whole.

Critical Audit Matters

Critical audit matters are matters arising from the current period audit of the financial statement that were communicated or required to be communicated to the audit committee and that (i) relate to accounts or disclosures that are material to the financial statement and (ii) involved our especially challenging, subjective, or complex judgments. We determined there are no critical audit matters.

NinjaTrader Clearing, LLC (d/b/a TransAct Futures, d/b/a NinjaTrader, d/b/a Tradovate)

NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2025

1. Nature of operations and summary of significant accounting policies

Nature of Operations

NinjaTrader Clearing, LLC (d/b/a NinjaTrader, Tradovate, and Kraken Derivatives US, f/k/a York Business Associates, LLC) ("The Company") was formed as a limited liability company under the laws of the State of Delaware in January 1998. Effective May 29, 2002, the Company was registered as a futures commission merchant ("FCM") with the Commodity Futures Trading Commission ("CFTC") and is a member of the National Futures Association ("NFA"). On November 30, 2024, two affiliated registered Independent Introducing Brokers ("IIBs"), NinjaTrader Brokerage, LLC and Tradovate, LLC, were merged into the Company. The Company engages in the execution of futures contracts for customers located primarily in the United States and abroad, including South America, Europe, Africa, Asia, and Australia. The Company is a wholly owned subsidiary of NinjaTrader Group, LLC. NinjaTrader Group, LLC is a wholly owned subsidiary of NinjaTrader Group Holdings, LLC.

On May 1, 2025, 100% of the ownership interest in NinjaTrader Group Holdings, LLC and all of its wholly owned subsidiaries, including the Company, were acquired by Payward, Inc. The Company elected to not apply pushdown accounting in accordance with FASB ASC 805-50, Business Combinations – Pushdown Accounting.

Government and Other Regulation

The Company's business is subject to significant regulation by governmental agencies and self-regulatory organizations. Such regulation includes, among other things, periodic examinations by these regulatory bodies to determine whether the Company is conducting and reporting its operations in accordance with the applicable requirements of these organizations.

Basis of Presentation

The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP") as detailed in the Financial Accounting Standards Board's ("FASB") Accounting Standards Codification ("ASC").

Cash and Cash Equivalents

Cash and cash equivalents may include cash on hand, cash at banks, and highly liquid investments with original maturities of three months or less at the date of purchase. These investments are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value. At December 31, 2025, cash consisted solely of cash held at banks.

Revenue from Contracts with Customers

Revenue from contracts with customers is recognized when, or as, the Company satisfies its performance obligations by transferring the promised services to the customers. A service is transferred to a customer when, or as, the customer obtains control of that service. A performance obligation may be satisfied at a point in time or over time. Revenue from a performance obligation satisfied at a point in time is recognized at the point in time that the Company determines the customer obtains control over the promised service. Revenue from a performance obligation satisfied over time is recognized by measuring the Company's progress in satisfying the performance obligation in a manner that depicts the transfer of the services to the customer. The amount of revenue recognized reflects the consideration the Company expects to receive in exchange for those promised services (i.e., the "transaction price"). In determining the transaction price, the Company considers multiple factors, including the effects of variable consideration, if any.

NinjaTrader Clearing, LLC (d/b/a TransAct Futures, d/b/a NinjaTrader, d/b/a Tradovate)

NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2025

Commissions, exchange and clearing fees are charged to customers for order execution services and trade clearing and settlement services. These services represent a single performance obligation as the services are not separately identifiable in the context of the contract. The Company recognizes revenue at a point in time at the execution of the order (i.e., trade date). Commissions, exchange and clearing fees are generally collected from cleared customers on the trade date.

The Company earns fee income based on agreed upon fee arrangements with customers. The fees can be based on the volume of transactions, account inactivity, trading positions, or other add-on features used by the customer. Revenue related to these fees is recognized using the as-invoiced practical expedient, as the Company's right to consideration is an amount that corresponds directly to the value provided to the customer. For fee revenue based on account activity or add-on features, the Company recognizes revenue monthly as the performance obligation is satisfied and services are provided to customer accounts. For fee revenue based on volume of transactions or trading positions, the Company recognizes revenue at the point in time in which the customer's activity triggers the fee.

The Company offers customers monthly and lifetime brokerage account plans which, among other features, provide customers with discounted commission rates in exchange for a monthly or lifetime brokerage account fee. All fees for brokerage accounts are paid by the customer upfront. Customers who do not elect a brokerage account plan pay standard commission rates. Revenue for monthly brokerage account plans is recognized during the month in which the customer pays for and receives discounted commissions provided by the plan. Revenue for lifetime brokerage account plans is recognized over the expected average customer life of 18 months, during which the customer receives the benefit of discounted commissions provided by the plan. The expected average customer life of 18 months was calculated using the input method, based on customer activity and attrition data which approximate the Company's satisfaction of the lifetime brokerage account plan performance obligation over time. Deferred revenue balances of \$2,137,597 and \$2,292,123 at January 1, 2025 and December 31, 2025, respectively, consisted of lifetime brokerage account fees collected from customers, which will be recognized over the expected average customer life.

Interest revenue represents interest earned by the Company from its Cash, Cash segregated under Federal and other regulations, and Securities owned segregated under Federal and other regulations. Interest revenue is recognized on an accrual basis.

Accounts receivable related to revenue from contracts with customers were \$590,546 and \$66,470 at January 1, 2025 and December 31, 2025, respectively, which were primarily recorded as a component of Receivable from customers on the Statement of Financial Condition.

Commissions, Brokerage, Exchange and Clearing Fee Expenses

Commissions, brokerage, exchange and clearing fee expenses include direct expenses incurred by the Company to facilitate its order execution, trade clearing, and settlement services on its customers' behalf.

Securities and Derivative Financial Instruments

Transactions in securities and derivative financial instruments are recorded on trade date and recorded at fair value. Interest is recognized on the accrual basis.

NinjaTrader Clearing, LLC (d/b/a TransAct Futures, d/b/a NinjaTrader, d/b/a Tradovate)

NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2025

Translation of Foreign Currency

Assets and liabilities denominated in foreign currencies are translated into United States dollar amounts at the year-end exchange rates. Transactions denominated in foreign currencies are translated into United States dollar amounts on the transaction date.

Income Taxes

The Company is treated as a disregarded entity for federal and state tax purposes. The Company is taxed under sections of the federal and state income tax laws which provide, in lieu of corporation income taxes, that the members separately account for their pro rata shares of the Company's items of income, deductions, losses, and credits, except for states that do not recognize limited liability companies. Accordingly, no provision for income taxes has been recorded in the financial statements.

Management evaluated the Company's tax positions and concluded that the Company has taken no material uncertain income tax positions that require adjustment to the financial statements to comply with the provisions of the guidance on accounting for uncertainty in income taxes for the year ended December 31, 2025. The Company's 2022-2025 tax years remain open and subject to examination by federal and state taxing authorities. The Company does not expect the amount of unrecognized tax expense or benefit to materially change in the next twelve months.

The Company recognizes interest related to income tax matters in interest expense. The Company recognizes penalties related to income tax matters in income tax expense. The Company did not recognize any amounts for interest or penalties related to income tax matters during the year ended December 31, 2025.

Use of Estimates

The preparation of financial statements in conformity with GAAP in the United States of America requires the Company's management to make estimates and assumptions that affect the amounts disclosed in the financial statements. Actual results could differ from those estimates.

Software Development Costs

The Company capitalizes costs related to the development and implementation of internal use software in compliance with FASB ASC 350-40, Internal Use Software. Software development costs are capitalized as long-lived assets during the application development stage, until the software is ready for its intended use. Costs incurred during the preliminary project stage and postimplementation stage, including research, maintenance, and training, are expensed as incurred. Capitalized internal use software costs are amortized using the straight-line method over the estimated useful life of the related software of approximately 3 years.

Current Expected Credit Losses

The Company accounts for current expected credit losses on financial assets measured on an amortized cost basis, including Receivable from clearing brokers and Receivable from customers, and certain off-balance sheet credit exposures in accordance with FASB ASC 326-20, Financial Instruments – Credit Losses ("ASC 326-20"). ASC 326-20 requires the Company to estimate expected credit losses over the life of its financial assets and certain off-balance sheet exposures as of the reporting date based on relevant information about past events, current conditions, and reasonable and supportable forecasts about the future. The Company records the estimate of expected credit losses as an allowance for credit losses. For financial assets measured on an amortized cost basis, the allowance for credit losses is reported as a valuation account on the balance sheet that adjusts the asset's amortized cost basis. Changes in the allowance for credit losses are reported as credit loss expense.

NinjaTrader Clearing, LLC (d/b/a TransAct Futures, d/b/a NinjaTrader, d/b/a Tradovate)

NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2025

ASC 326-20 allows for a practical expedient for certain financial assets that are secured by collateral maintenance. The practical expedient is applicable for financial assets in which the borrower is required to continually replenish the collateral securing the financial asset, and for which the Company expects the borrower to continue to replenish the collateral. The Company elected to apply this practical expedient to its Receivables from customers, as it determined this amount meets the eligibility requirements.

Refer to Note 4 and Note 8 for additional disclosures on the Company's credit risk and measurement of expected credit losses for financial assets measured at amortized cost under ASC 326-20.

2. Funds Segregated or Held in Separate Accounts under Federal Regulations

On December 31, 2025, assets segregated or held in separate accounts under the Commodity Exchange Act included in the Statement of Financial Condition are as follows:

Cash	\$ 109,443,846
Securities owned segregated under Federal and other regulations, at fair value	256,712,420
Receivable from clearing broker	<u>2,277,149</u>
	<u>\$ 368,433,415</u>

3. Investments at Fair Value

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e., the "exit price") in an orderly transaction between market participants at the measurement date.

In determining fair value, the Company uses various valuation approaches. ASC 820, "Fair Value Measurements and Disclosures" establishes a fair value hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are those that market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Company.

Unobservable inputs reflect the Company's assumptions about the inputs market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. ASC 820 requires use of a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels: quoted market prices in active markets for identical assets or liabilities (Level 1); inputs other than quoted market prices that are observable for the asset or liability, either directly or indirectly (Level 2); and unobservable inputs for an asset or liability (Level 3).

The Company values Treasury bills ("T-Bills") and Treasury bonds ("T-Bonds") daily utilizing mark-to-market method of accounting. Daily revaluations are based on quoted market prices or discounted cash flows. The Company generally holds a mixture of on-the-run T-Bills and T-Bonds, representing the most recently issued securities of a given maturity, and off-the-run T-Bills and T-Bonds, representing the securities that were issued before the most recent issue and are still outstanding. On-the-run T-Bills and T-Bonds held by the Company are considered Level 1 financial instruments, while off-the-run T-Bills and T-Bonds are considered Level 2 financial instruments.

NinjaTrader Clearing, LLC (d/b/a TransAct Futures, d/b/a NinjaTrader, d/b/a Tradovate)

NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2025

The following table presents the Company's fair value hierarchy for those assets measured at fair value on a recurring basis as of December 31, 2025:

<u>Assets</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Securities owned segregated under Federal and other regulations, at fair value				
U.S. Treasury obligations - Treasury bills	\$ 145,919,330	\$ -	\$ -	\$ 145,919,330
U.S. Treasury obligations - Treasury bonds	110,793,090	-	-	110,793,090
Receivables from clearing brokers				-
Net unrealized gain on open futures contracts	1,556,158	-	-	1,556,158
Total assets	<u>\$ 258,268,578</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 258,268,578</u>

4. Receivable from clearing brokers

Receivable from clearing brokers consists of cash deposits and unrealized gains and losses on open commodity futures contracts. A portion of the Company's trades and contracts are cleared through clearing brokers and settled daily between the clearing brokers and the Company. Because of the daily settlement, the amount of unsettled credit exposure is limited to the amount owed to the Company for a short period of time, typically one trading day. Cash deposits and financial instruments held at the Company's clearing brokers collateralize amounts due to brokers, if any, and may serve to satisfy regulatory or margin requirements. Based on the Company's past history of daily settlement with the clearing brokers and expectation of reliable daily settlement in the future, no allowance for credit loss has been recorded against receivable from clearing brokers at December 31, 2025. The Company continually reviews the credit quality of its clearing brokers.

At December 31, 2025, receivable from clearing brokers consisted of the following:

Cash held at clearing broker	\$ 1,475,906
Net unrealized gain on open futures contracts	1,556,158
	<u>\$ 3,032,064</u>

At December 31, 2025, the Company also owned securities totaling \$19,443,300 held at clearing brokers, which were recorded as a component of Securities owned segregated under Federal and other regulations, at fair value on the Statement of Financial Condition. At December 31, 2025, cash and securities balances of \$20,919,206 serve to satisfy margin requirements of \$9,912,272.

5. Derivative contracts

In the normal course of business, the Company utilizes derivative contracts in connection with its trading activities. Investments in derivative contracts are subject to additional risks that can result in a loss of all or part of an investment. The Company's derivative activities are primarily used to manage foreign currency and interest rate fluctuations. These derivative contracts are recorded on the Statement of Financial Condition in receivable from a clearing broker. In addition to its primary underlying risks, the Company is also subject to additional counterparty risk due to inability of its counterparties to meet the terms of their contracts.

At December 31, 2025, the volume of the Company's derivative activities based on their notional amounts and number of contracts, categorized by primary underlying risk and the fair value of the derivative instruments do not have a material impact on the Statement of Financial Condition.

NinjaTrader Clearing, LLC (d/b/a TransAct Futures, d/b/a NinjaTrader, d/b/a Tradovate)

NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2025

6. Net capital requirement

As an FCM, the Company is subject to the net capital requirements under Regulation 1.17 of the Commodity Exchange Act. Under these provisions, the Company is required to maintain minimum net capital, as defined, of the higher of \$1,000,000, or the sum of 8 percent of customer and 8 percent of non-customer risk maintenance margin requirements on all positions. Adjusted net capital and risk maintenance margin requirements change from day to day. At December 31, 2025, the Company had a net capital requirement of \$1,000,000 and adjusted net capital of \$84,221,900, resulting in an excess of \$83,221,900. At December 31, 2025, the Company was in compliance with these capital requirements. The net capital requirements could effectively restrict the payment of cash distributions, the making of unsecured loans to its owners or affiliates and the purchase by the Company of its own membership interests.

7. Off balance sheet risk and concentration of credit risk

Customer activities

In the normal course of business, the Company executes transactions for the accounts of its customers. These activities may expose the Company to off balance sheet risk in the event the customer is unable to fulfill its contracted obligations and the Company has to purchase or sell the financial instrument underlying the contract at a loss.

The customer's transactions are cleared through a clearing broker. Futures contracts are commitments to either purchase or sell a commodity at a future date for a specified price and may be settled in cash or through delivery of the underlying financial instrument. Margin deposit requirements required to enter into such contracts are generally small in value in comparison to the gross value of the underlying futures contract. Margin is a good faith deposit from the customer that reduces the risk to the Company of failure by the customer to fulfill obligations under these contracts. To minimize exposure to risk due to market variation, the Company requires customers to maintain margin collateral in compliance with various regulatory and internal guidelines. The Company monitors required margin levels on a daily basis and pursuant to guidelines require customers to deposit additional collateral or to reduce or liquidate positions when necessary. The Company believes that collateral held at December 31, 2025, was adequate to minimize the risk of material loss that could be created by customer positions held at that time.

Credit risk

Credit risk arises from the potential inability of a customer or counterparty to perform in accordance with the terms of open contracts. The Company's exposure to credit risk associated with the counterparty nonperformance is limited to the current cost to replace all contracts in which the Company has a gain. Exchange-traded financial instruments, such as futures, generally do not give rise to significant counterparty exposure due to the cash settlements procedures for daily market movements or the margin requirements of the individual exchanges.

Concentration of credit risk

In the normal course of business, the Company enters into various transactions with clearing brokers, banks and other financial institutions. The Company is subject to credit risk to the extent any financial institution with which it conducts business is unable to fulfill contractual obligations on its behalf. Management monitors the financial condition of such financial institutions and does not anticipate any losses from these counterparties.

The Company maintains its cash balances in financial institutions, which at times may exceed federally insured limits. The Company has not experienced any losses in such accounts. Management believes the Company is not exposed to any significant credit risk on cash.

NinjaTrader Clearing, LLC (d/b/a TransAct Futures, d/b/a NinjaTrader, d/b/a Tradovate)

NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2025

Foreign currency risk

The Company may be exposed to foreign currency fluctuations due to customer activities. The Company enters into futures contracts to hedge against net exposure denominated in foreign currencies. Gains and losses on these contracts are recognized in the Statement of Income as other revenue.

8. Receivable from and payable to customers

Receivable from customers represents the total amount of net deficit customer balances. Payable to customers represents the total amount of net credit customer balances. The Company monitors its customer receivables daily to ensure that the appropriate levels of collateral are maintained and in compliance with various regulatory, exchange, and internal requirements. Customers with a net deficit balance are required to meet a margin call, deposit additional funds, and/or reduce positions in order to satisfy a net deficit balance. Customer receivables are recorded net of an allowance for credit losses, which represents the amount of net customer deficit balances which the Company deems uncollectible. At December 31, 2025 the allowance for credit losses was \$478,993, which was based primarily on historical collection experience and future expected collections on specific customer receivables. For all other customer receivable balances, no allowance for credit losses has been recorded as the Company has determined, in accordance with the practical expedient under ASC 326-20 noted in Note 1, that it expects the remaining customers to continually meet the collateral maintenance requirements.

9. Commitments and contingent liabilities

The Company is subject to certain legal, regulatory, and arbitration proceedings and claims that may arise from time to time in the ordinary course of business. Management believes that the disposition of these matters will not have a material adverse effect on the financial position or results of operations of the Company.

10. Indemnifications

In the normal course of business, the Company enters into contracts that contain a variety of representations and warranties that provide indemnifications under certain circumstances. The Company's maximum exposure under these arrangements is unknown and the risk of material loss is remote, as it would require future claims that may be made against the Company that have not occurred. Management of the Company expects the risk of any futures obligations under these indemnifications to be remote.

11. Related party transactions

As stated in Note 1, the Company is a wholly owned subsidiary of NinjaTrader Group, LLC. The Company shares in certain expenses incurred by NinjaTrader Group, LLC as governed by an expense sharing agreement. During the year ended December 31, 2025, NinjaTrader Group, LLC provided certain services to the Company related to payroll, benefits, and other administrative services. The Company also shares a leased office space with NinjaTrader Group, LLC, of which a portion of the related expenses are recognized by the Company in accordance with the expense sharing agreement. In addition, the Company may reimburse NinjaTrader Group, LLC for various expenses billed directly to NinjaTrader Group, LLC that were incurred on the Company's behalf. Accounts payable, accrued expenses and other liabilities at December 31, 2025 include \$1,970,900 due to NinjaTrader Group, LLC for payroll and other shared services.

The Company is an affiliate of NinjaTrader, LLC, a software development company, and shares in certain overhead expenses as governed by an expense sharing agreement. NinjaTrader, LLC directly licenses its software platform to the Company for a monthly volume-based fee. The Company may also incur software development costs for activities that directly support NinjaTrader, LLC's software platform, which may be subject to capitalization under ASC 350-40

NinjaTrader Clearing, LLC (d/b/a TransAct Futures, d/b/a NinjaTrader, d/b/a Tradovate)

NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2025

by NinjaTrader, LLC. In addition, the Company may reimburse NinjaTrader, LLC for various expenses billed directly to NinjaTrader, LLC that were incurred on the Company's behalf, or vice versa. Receivable from affiliates at December 31, 2025 include \$654,423 due from NinjaTrader, LLC for various shared services.

The Company is an affiliate of NT Technologies, LLC, a software licensing company, and shares in certain overhead expenses as governed by an expense sharing agreement. The Company primarily incurs market data costs from a third party vendor on NT Technologies, LLC's behalf, and gets reimbursed for these costs by NT Technologies, LLC. In addition, the Company may reimburse NT Technologies, LLC for various expenses billed directly to NT Technologies, LLC that were incurred on the Company's behalf, or vice versa. Receivable from affiliates at December 31, 2025 include \$2,336,393 due from NT Technologies, LLC for market data and other shared services.

12. Subsequent events

These financial statements were approved by management and available for issuance on February 27, 2026. Subsequent events have been evaluated through this date. There were no subsequent events requiring disclosures or adjustments.
